

Brass Grippers™

Patent # 8,916,173 B2

Brass Grippers™, the **ULTIMATE** simple solution you have been waiting for to **hold cases for cleaning or uniforming primer pockets** and **cleaning or polishing the inside of the neck**.

- The unique quick open/close handle assembly lets you load and unload hundreds of cases per hour.
- With gentle ambidextrous use and very slight grip pressure to firmly hold the case, you won't have sore fingers or hands, even after hundreds of case preparations.
- Only one hand is required to activate the handle assembly to load or unload with a sensitive hold that enables the user to feel the case cleaning action.
- With interchangeable case jaws that are machined with standard chamber reamers, there is absolutely no marring or case distortion, regardless of grip pressure.
- Brass Grippers™ works with dry or lubed cases and so there is no need to clean lube from the cases after resizing.
- The jaws are color anodized and laser marked with caliber description. Changing them is a simple 1-minute operation.
